(i)   I write the functions as the pseudo code in ppt by teacher.

(ii)   I didn't add any assertion.

(iii) There's no bug in a.v, but a bug in Traffic.v: output 9.

(iv)   In the a.v and Traffic.v files, my program does the same thing as the reference program do. But in vending.v, I don't have time to execute it yet.

(v)   I don't use any advance techniques in the design.
